Overall Business Operations

The Bank continued to operate the business on a prudent basis amid the various uncertainties surrounding 2020 by focusing on growing quality loan portfolio and continuing with our strategic plan on expanding the Bank's 3 key business pillars: Credit Business, Private Banking Business and Investment Banking Business in order to diversify and enhance the Bank's current opportunities. As a result, the Bank has been able to deliver solid performance which helped to lessen the impacts arising from the many challenges during the past year.

The consolidated net profit of the Bank and subsidiaries for 2020 totaled Baht 5,123 million, a decline of 14.4% from 2019 mainly from the increase in provisions as a result of the continued uncertainties from the economic slowdown as impacted by COVID-19. The consolidated comprehensive income for 2020 totaled Baht 5,416 million, decreased of 3.7% comparing to 2019. Pre-provision operating profit for 2020 increased by 17.9% with higher net interest income of 19.2% yoy driven by loan growth and lower funding costs from continuous cost management while non-interest income declined slightly by 4.3% from the slowdown in economic activities. For operating expenses, the Bank continued to focus on spending that are in accordance with the Bank long term strategic plans together with effective cost management control resulting in overall operating expenses to decline by 3.5%[1]. The Bank remained prudent by increasing the level of provisions taking into account the economic slowdown and prolonged uncertainties from the COVID-19 situation resulting in high expected credit loss amount during 2020 totaling Baht 4,095 million.

For loan portfolio, the Bank continued to focus on asset quality management while expanding into profitable segment with better asset quality taking in careful considerations the economic conditions. As such, the overall Bank's loan portfolio for 2020 expanded by 12.4%[2] from the end of 2019 with growth driven by hire purchase, housing and corporate lending segment. For asset quality, the Non-Performing Loans (NPLs) to total loans ratio for 2020 declined further to 2.9%[2] from 4.0% at the end of 2019 from asset quality management and also from growth in the loan portfolio.

The Bank current level of capital remains strong and is above the minimum requirement by the Bank of Thailand with the capital adequacy ratio as of end of December 2020 at 17.39%.

For Capital market business, the market share (SET and mai excluding proprietary trading) of Kiatnakin Phatra Securities Plc. for 2020 continued to increase to 10.85% from 9.61% during 2019, ranking 1st from total 38 brokers.

Overall market environment

The Thai economy in 2020 has plunged into a severe economic recession as the world grappled with the impact of the COVID-19 pandemic. Although Thailand was regarded as one of the most successful countries in the world in controlling the outbreak, it was also one of the countries facing the worst impact from COVID-19 as 12% of Thailand's gross domestic product (GDP) is from the tourism sector. In addition, the decline in Thailand's major trade partners' income resulted in considerable reduction of Thailand's export revenue, on top of the negative effects from the US-China trade war during the pre-pandemic years. In addition, the decrease in

business and household income amid elevated uncertainties clouding the economic outlook triggered a significant decline in domestic consumption and investment despite government support through various stimulus packages. For the first eleven months of 2020, the number of tourist arrivals contracted by 81.4% YoY to 6.7 million people, while exports fell by 6.9% yoy. Excluding exports of gold and arms, the value of Thai exports declined by 9.8% yoy.

In 2021, the recovery of the Thai economy is expected to be fragile and uneven across sectors and geography. The tourism industry is likely to remain weak as we anticipate only 2 million tourist arrivals in the fourth quarter of 2021, still much lower than the pre-crisis figure of around 40 million people per year. Furthermore, the second wave of the outbreak that started towards the end of 2020 will slow down the recovery of domestic consumption and investment in the first quarter of 2021 compared to the initial projection. However, domestic economic recovery is expected to resume given that the outbreak of COVID-19 local infections does not prolong and no national lockdown measures. Thailand's export growth in 2021 is projected to recover as global demand picks up and consumer confidence improves with the COVID-19 vaccine optimism.

Key risks that could derail the recovery of the Thai economy in 2021 include 1) a severe outbreak of the current second wave which could induce the government to enforce additional national lockdown measures, causing negative impact on consumption, investment as well as the delay of border reopening; 2) financial health of businesses especially in the tourism sector, which, if deteriorating further, may lead to a credit event as well as affect employment and household income situations; 3) a strengthening Thai Baht which may impede the recovery of Thailand's exports; and 4) domestic political uncertainties that may affect investor confidence and result in a delay of government policy implementation.

For the auto industry, the total number of car sales in the first eleven months of 2020 stood at 688,071 units, contracting by 25.1% yoy, with the passenger vehicle segment and the commercial vehicle segment contracting by 35.3% yoy and 18.3% yoy, respectively. The underperformance of the car industry was consistent with the economy-wide economic slowdown and the credit tightening by financial institutions following signs of deterioration in loan quality.

In the equity market, the average daily turnover (SET and mai) for 2020 increased by 29.0% from Baht 53,192 million in 2019 to Baht 68,607 million in 2020. The SET index at the end of 2020 closed at 1,449.35 points, declining by 8.3% from 1,579.84 points at the end of 2019.

Key changes for the year 2020

Changes in Financial Reporting Standards

The financial statements for the year 2020 were prepared in accordance with the Thai Financial Reporting Standard No.9 Financial Instruments (TFRS 9) and Thai Financial Reporting Standard No.16 Leases (TFRS 16) guidelines which became effective from January 1, 2020 while the financial statements for the period during 2019 were prepared in accordance with existing guidelines prior to the adoption of TFRS 9 and TFRS 16. The key changes from the adoption of the above financial reporting standards are in the following areas:

- The concept of interest recognition will be changed to recognize at effective interest rate (EIR)

- Classification and measurements of financial instruments into following categories: Amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit and loss (FVTPL)
- Impairment of financial assets based on an expected credit loss (ECL) framework with financial assets classification into 3 stages. Stage 1: financial assets where the credit risk has not increased significantly with loss allowance based on 12 month expected credit loss. Stage 2: financial assets where the credit risk has significantly increased and Stage 3: credit-impaired financial assets with loss allowance for Stage 2 and Stage 3 based on lifetime expected credit loss
- Classification of investment in receivables into Purchased or originated credit-impaired financial assets (POCI) measured at amortised cost
- Adoption of TFRS 16 requires the recognition of right-of-use assets and lease liabilities

Change of Company Name

From 17 August 2020 onwards, Kiatnakin Phatra Financial Group (KKP) has changed the name for the Bank and subsidiary companies of the Group. The change is a result of the merger in 2012 which enabled KKP to expand its service capabilities to meet the needs of more customers with the objective of providing seamless financial services whether in commercial banking or capital market business. All companies will use a new logo designed based on a combination of the existing logos of Kiatnakin Bank and Phatra Securities. The stock symbol for Kiatnakin Phatra Bank Public Company Limited will remain the same as KKP.

Update status on Coronavirus 2019 (COVID-19)

The COVID-19 situation has created many challenges and uncertainties during 2020. The Bank has provided assistant to customers through various relief measures both from the Bank own measures and those initiated from the Bank of Thailand. The relief measures that the Bank has implemented during 2020 include loan payment delay for principal/ interest, soft loans as part of BOT liquidity measures for SME customers, the reduction in lending rates for MLR, MOR, MRR, restructuring made to terms including installment reductions, loan term extension in line with the customer financial ability and other assistance as appropriate. The Bank also offers reductions in interest occurred during loan payment suspension period for customers resuming with repayment after the end of relief period.

For the Bank's customers whose financial relief measures had ended during 2020, the proportion of customers able to resume payment including those with terms modifications has overall been slightly higher than anticipated. For retail customers, all customers participating in the relief programs have exited the relief period at the end of 2020 with approximately more than 75% of customers able to service payments post relief

period. For commercial lending customers which are mostly loans with collateral, a small portion of these customers have exited the relief programs during the last quarter of 2020 with approximately 75% of these customers able to continue with their payments while the remaining 25% have term modifications and will likely be able to continue with payments. The remaining commercial lending customers will exit the relief programs during 2021. As of end of December 2020, customers who are still under the relief period have reduced to approximately 11% of the Bank's total loan outstanding.

Although the COVID-19 outbreak situation for Thailand has improved during the second half of 2020 allowing slight economic recovery during the second half of 2020. However, after considering the recent increase of COVID-19 cases at the end of 2020 and continuing into 2021 including the on-going spread of the virus in other countries, the Bank continue to monitor the situation closely while prudently assessing the portfolio quality. The Bank will continue to focus on providing support to customers and assisting in finding appropriate financial solutions on a case by case basis.

For 2020, non-interest income totaled Baht 6,554 million decreased by 4.3% yoy. The decline is mainly due to lower net fee and services income which amounted to Baht 4,336 million, declining by 5.8% from 2019. For the year 2020, fee from Brokerage business totaled Baht 2,240 million, a considerable increase of 28.2% yoy in line with the higher market trading activity of 29.0% yoy during 2020 together with the increase in market share of Kiatnakin Phatra Securities for 2020 to 10.85% from 9.61% in 2019, ranking 1st in market share. Meanwhile, loan related fees reduced yoy, whereby under TFRS 9, loan related fees are amortized and recorded in net interest income. Fee from Asset Management business totaled Baht 650 million declining 20.0% yoy from the decline in asset under management from overall market conditions while fee generated from investment banking business also declined during 2020 where the Bank has been able to record fee during the beginning of 2020 but subsequent market uncertainties from COVID-19 created slowdown in investment banking transactions. In addition to net fee and services income, the Bank also recorded higher gain on financial instruments measured at fair value through profit and loss comparing to 2019 from the Equity and Derivatives Trading Business and Financial Market Business which performed well during 2020.

For 4Q20, non-interest income totaled Baht 1,979 million, increasing 4.6% yoy driven by higher brokerage business income from the increase in market trading volume. Additionally, during 4Q20, the Bank recorded higher gain on financial instruments measured at fair value through profit and loss and also higher other operating income mainly from proceeds from sale of non-performing loans recorded during 4Q20.

Other operating expenses

For 2020, other operating expenses were Baht 10,652 million, increased by 4.5% yoy mainly from the items relating to foreclosed assets. As a prudent measure, during 1Q20, the Bank recorded additional impairment on revaluation of foreclosed assets in the amount of Baht 665 million on foreclosed properties that are deemed to require a long period of time to dispose while loss from sale of foreclosed assets also increased slightly yoy. Loss from sale of foreclosed assets during 2020 total Baht 894 million, a slight increase when comparing to loss of Baht 840 million yoy. Loss on sale of foreclosed assets comprised of loss from sale of repossessed cars amounting to Baht 1,309 million, with loss declining from Baht 1,423 million yoy from slower

car repossession activity during financial relief period and also from gain on sale of foreclosed properties which totaled Baht 415 million for 2020, decreasing from Baht 584 million during 2019 with sale activities starting to show improvement during the second half of 2020 after the lock down measures ended. If excluding loss from sale and revaluations of foreclosed assets, operating expenses for 2020 totaled Baht 8,910 million, declining by 3.5% comparing to 2019 mainly from the decrease in premises and equipment expenses and marketing expenses from reduced activities as a result of economic slowdown. Cost-to-income ratio excluding loss from sale and revaluations of foreclosed assets stood at 41.2% improving from 46.7% during 2019.

For 4Q20, other operating expenses were Baht 2,545 million, declining by 6.9% yoy driven by lower marketing expenses and lower loss from sale of foreclosed assets which for 4Q20 totaled Baht 138 million with loss from sale of repossessed cars amounting to Baht 212 million, with loss declining from Baht 441 million yoy from slower car repossession activity during financial relief period and from gain on sale of foreclosed properties recorded at Baht 74 million for 4Q20. Cost-to-income ratio excluding loss from sale and revaluations of foreclosed assets stood at 37.4% improving from 46.3% yoy.

Expected Credit Loss (ECL)

From 1 January 2020 onwards, the expected credit loss (ECL) will be based on impairment requirement under Thai Financial Reporting Standard No. 9 (TFRS 9). Financial instruments under TFRS 9 are classified into 3 stages. For stage 1, TFRS 9 requires ECL allowances based on 12 month expected losses. For Stage 2 and Stage 3, the standard requires ECL allowances based on lifetime expected losses. Moreover, ECL also incorporates forward-looking economic scenarios into loss allowances.

For 2020, expected credit losses totaled Baht 4,095 million, an increase of 144.2% comparing to Baht 1,676 million for 2019. Although, the situation surrounding COVID-19 has shown improvement during the second half of 2020 resulting in slight economic recovery during the second half of 2020. However, with the deterioration of the COVID-19 situation at the end of 2020 and continuing into 2021, which could delay the pace of economic recovery and may result in deterioration of asset quality in the coming periods. The Bank continued to exercise cautionary measure under the TFRS 9 framework by setting aside higher provisions and management overlay to reflect possible deteriorations resulting from COVID-19 impacts. Total management overlay for 2020 amounted to Baht 2,469 million. Total allowance for expected credit losses to total NPLs ratio

(coverage ratio) increased to 170.9% for 2020 from 111.2% for 2019. When excluding the release of excess loan loss reserve, provisions including loss from sale of repossessed cars (credit cost) for 2020 amounted to 2.55% of average loan comparing to 1.36% during 2019.

For 4Q20, expected credit losses totaled Baht 2,077 million, increasing from Baht 208 million yoy which includes management overlay in the amount of Baht 932 million. Excluding the release of excess loan loss reserve, provisions including loss from sale of repossessed cars (credit cost) stood at 3.63% of average loan for 4Q20.

The Non-Performing Loans (NPLs) or Stage 3 loans excluding POCI as of the end of December 2020 totaled Baht 7,751 million or 2.9% of total loans, decreasing from 4.0% at the end of 2019 with decline from both retail loans segment and commercial lending segment. The decline is from the Bank continuous focus on asset quality management including debt restructuring, write offs and sale of NPL together with growth in the loan portfolio. However, when comparing to 3Q20, amount of loans in Stage 3 increased slightly after the relief period ended with increase coming from the retail segment. Additionally, a portion of the loans have recently exited the relief programs and the Bank will need to continue to closely monitor the asset quality of all loan segments against an elevated economic uncertainties while setting aside prudent provisioning level for possible deterioration in asset quality post relief periods.
