November 24, 2017:	Mr.Vichai Assarasakorn was appointed to be Bank's Director and Independent Director in place of Mr.Supant Mongkolsuthree who resigned.

Management Discussion and Analysis for the year 2017

This report discusses the principal changes in the audited consolidated financial statements for the year ended December 31, 2017. In June 2017, the Bank has combined National ITMX Co., Ltd to the Bank's associate company in accordance with Thai Accounting Standard 28 (TAS 28): Investments in Associates and Joint Ventures. The Bank considered its shareholding together with its power to participate in the company's operating policy through its representatives in the position of the company's board of directors as significant influence to the company. The Bank also restated the consolidated financial statements for Statements of Financial Position as at December 31, 2016 and Statements of Comprehensive Income for the year ended December 31, 2016. However, the above change had insignificant impact to financial position and performance of the Bank.

The Bank and Its Subsidiaries' Overview for the year 2017

In 2017, the Thai economy continued to expand due mainly to exports and tourism sectors. Merchandise exports continued to grow in all major export destinations and most product categories. Meanwhile, the tourism sector expanded significantly due to increased foreign tourists especially Chinese and ASEAN tourists. However, the growth in the private investment sector remained relatively low and concentrated only in a few business sectors. In addition, the expansion of private consumption was suppressed by the decreased in farm income during the second half of the year and the high household debt problem, which lowered purchasing power of low-income households.

For the year 2017, KTB's consolidated pre-provision profit was Baht 73,741 million, decreased by Baht 316 million (0.43%). Fee and service income and operating expenses improved and offset the slight decrease in net interest income. In summary, the key changes of the Bank and its subsidiaries' financial result compared to last year are as shown below:

1) Net interest income declined by Baht 1,188 million (1.37%) due mainly to the impact of the lending rate cut on Minimum Retail Rate (MRR) at 0.50% in mid of May 2017. Despite the mentioned impact on yield, the Bank has continued to actively manage funding cost, resulting in the slight decrease on Net Interest Margin (NIM) by 0.06% to 3.24%, compared to 3.30% at the year 2016.

2) Net fee and service income increased by Baht 1,979 million (8.98%) as a result of the expansion of fee from ATM card business, electronic banking service fees and Bancassurance. Meanwhile, KTB's consolidated total other operating income decreased by Baht 2,342 million (14.94%) from the year 2016 because of the lessening of net gain on trading and foreign exchange transactions as well as the decelerating of share of profit from investments on equity method from the Bank's associated company from insurance sector. The Bank had revenues from litigation settlement amounted to Baht 1,636 million.

3) Other operating expenses reduced by Baht 1,235 million (2.44%) as the Bank continues its cost management policy resulting in the slight reduction of the cost-to-income ratio compared to last year, from 40.61% to 40.11%.

4) The Bank and its subsidiaries continue to maintain a prudent coverage ratio. As at the end of December 2017, coverage ratio was 121.71%. Provision expenses increased by Baht 11,404 million (34.11%) from 2016, partly due to the preparation to comply with the International Financial Reporting Standard 9: IFRS9.

In 2017, The Bank and its subsidiaries' net profit was Baht 24,110 million, showing a decline of Baht 9,455 million (28.17%) and the Net Profit Attributable to Equity Holders of the Bank was Baht 22,440 million, decreased by Baht 9,864 million (30.53%), mainly due to the increase of provision expense.

The Bank's consolidated total loan to customers (less deferred revenue) was Baht 1,938,082 million, rose by Baht 33,993 million (1.79%) from year 2016. The Bank focused on quality of loan growth as the loans to government and state enterprise sector were well expanded. The Bank's consolidated deposits increased by

Baht 98,471 million (4.99%) from savings and demand deposits while time deposits decreased as the Bank's funding cost management policy and brought about loans to customers (less deferred revenue) -to-deposits ratio at 93.59%.

The Bank' consolidated NPLs as at December 31, 2017 was Baht 103,020 million, and gross NPLs ratio was 4.19% rose from 3.97% as at December 31, 2016. The Bank has continued to improve its strategies and business operating process emphasizing on quality of loan portfolio along with enhancing efficiency of monitoring and restructuring process. The Bank will maintain its coverage ratio at the appropriate level.

Overall, the Bank and its subsidiaries have strong financial position, solid capital level and effective business operation to cope with any uncertainty in the future.

The Bank and Its Subsidiaries' performance

Performance for the year ended December 31, 2017

Operating Profit before Tax and Net Profit

In 2017, KTB's consolidated pre-provision profit was Baht 73,741 million, decreased by Baht 316 million (0.43%) compared to the year 2016. After deducting Baht 44,833 million impairment loss on loans and debt securities (further information was showed in part F) impairment loss on loans and debt securities) and Baht 4,798 million income tax expense, net profit for the year 2017 was Baht 24,110 million, showing the decrease of Baht 9,455 million (28.17%) compared to the year 2016. Net profit, attributable to equity holders of the Bank, was Baht 22,440 million, showing the decrease of Baht 9,864 million (30.53%) because of the addition of Impairment loss of loans and debt securities

[2] The bank's consolidated financial statements for Statements of Comprehensive Income for the year ended December 31, 2016 was restated by combining National ITMX Co., Ltd to the Bank's associate company in accordance with Thai Accounting Standard 28 (TAS 28): Investments in Associates and Joint Ventures.

Net Interest Income

In 2017, KTB's consolidated net interest income equaled Baht 85,778 million, showing the decrease of Baht 1,188 million (1.37%) from 2016. Most of impacts were from the lending rate cut on Minimum Retail Rate (MRR) at 0.50% since mid of May 2017, together with the growth of Government and State Enterprise loans as the focus on loan quality. Despite the mentioned impact on yield, the Bank has continued to actively manage funding cost, resulting in the slight decrease on Net Interest Margin (NIM) by 0.06% to 3.24%, compared to 3.30% at the year 2016.

Statutory Capital Fund

As of December 31, 2017, the Bank and the Financial Business Group Common Equity Tier 1 was Baht 267,456 million (13.42% of its Risk-weighted assets (RWA)). The Tier I capital was Baht 268,606 million (13.48% of its RWA). Total capital was Baht 342,748 million (17.20% of its RWA), increased from 16.60% as at December 31, 2016. The increase of capital ratio was due to the appropriation of its net profit for the first half of 2017 for capital.

In 2017 the Bank issued its subordinated debentures, as Tier 2 capital, of Baht 20,000 million to replace the redeemed debentures of Baht 20,288 million.

Currently, the bank possesses healthy capital ratios compared to BOT's requirement. Moreover, the bank regularly reassesses the capital level to be in accordance with the BOT's requirement as well as any foreseeable risk to ensure the adequate capital.
