1. Executive Summary

In 2025, SCBX navigated a complex macroeconomic landscape defined by subdued growth and heightened uncertainty. While global headwinds and domestic structural vulnerabilities—compounded by margin pressure from multiple interest rate cuts—presented significant challenges, the Group's strategy remained resilient. SCBX prioritized disciplined cost management and prudent risk control, ensuring that SCBX remains positioned to deliver sustainable, long-term value for our stakeholders.

SCBX delivered a net profit of Baht 47.5 billion in 2025, representing an 8.1% yoy increase despite a challenging operating environment. The growth was primarily driven by strong investment gains from both the Bank's and SCB 10X's portfolios, reflecting effective portfolio management and favorable market conditions. Additionally, fee income from wealth management remained robust, driven significantly by strategic organizational restructuring and the deployment of AI-powered advisory tools, which improved service productivity, alongside favorable market conditions. Conversely, bancassurance income softened, primarily reflecting its correlation with our prudent loan consolidation strategy. Cost discipline also contributed positively, with a cost-to-income ratio of 40.5%, outperforming 2025 guidance. These factors partially offset the impact of lower net interest income, which was pressured by a declining NIM and negative loan growth.

Loan volumes declined by 2.1% yoy across both Gen 1 and Gen 2 businesses, reflecting the Company's prudent approach to safeguarding credit quality amid a subdued economic environment. Growth remains highly selective, with management prioritizing risk-adjusted returns over volume expansion. The Company continues to monitor market dynamics closely and stands ready to recalibrate lending strategies as economic indicators stabilize and opportunities emerge. Looking ahead, the Company expects gradual recovery in loan demand and targeted growth initiatives in high-potential segments, while maintaining prudent credit discipline.

Asset quality remained well-managed, with the NPL ratio at 3.29%, compared to 3.37% in 2024, supported by enhanced collection efficiency and proactive measures such as the "You Fight, We Help" program. New NPL formation remained relatively stable, underscoring the effectiveness of the Company's risk management strategies. Enhanced collection processes, early warning systems, and customer support programs remain in place to mitigate potential credit deterioration and preserve overall asset quality. In line with its prudent provisioning policy, the Company allocated an additional Baht 4,500 million in Management Overlay (MO) during 2025 to reinforce resilience against potential downside risks. As of December 31, 2025, 55% of the total eligible loans under Phase 1 and 2 of Measure 1 in the 'You Fight, We Help' program had been signed, amounting to Baht 71.6 billion.

2. Thailand's Economic Outlook

Thailand's economy in 2025 grew by 2.4%, slowing from 2.9% in the previous year. The deceleration reflected weaker private consumption driven by sluggish labor income growth amid a more fragile labor market and declining consumer confidence. The tourism sector expanded at a slower pace, with foreign tourist arrivals declining to 32.97 million due largely to a sharp contraction in arrivals from China. Meanwhile, industrial production continued to contract. Despite these headwinds, the Thai economy benefited from solid merchandise export growth, supported by the upturn in the global electronics cycle, front-loading of imports by trading partners ahead of higher U.S. tariffs beginning in August and a surge in gold exports since the start of the year. Government spending also accelerated after disbursement of the annual budget was expedited. Headline inflation in 2025 registered at -0.1%, marking the first contraction in five years, largely attributable to a sharp decline in global energy prices, government cost-of-living support measures for energy and limited demand-side inflationary pressures.

In 2026, Thailand's economic growth is expected to slow further to 1.5%. Downside pressures will be driven primarily by external factors, including a slowdown in the global economy resulting from U.S. tariff measures and heightened global competition, which together increase the risk of a contraction in Thai exports. While the tourism sector is expected to continue its gradual recovery, foreign tourist arrivals are likely to remain well below 2019 levels amid increasingly intense competition within Asia's tourism market (the so-called "tourism war"). At the same time, structural constraints within the Thai economy will tighten. Household debt will remain elevated relative to income, leading to more cautious consumption behavior amid ongoing debt deleveraging, while financial institutions maintain a prudent stance toward lending to households and vulnerable businesses. Private investment is expected to expand only modestly despite support from projects promoted by the Board of Investment (BOI) in high-potential industries. Spillover effects on the real economy will remain limited due to the rising share of imported capital goods in the current phase of investment. The manufacturing sector will continue to recover slowly amid weak demand, declining productivity and heightened competitive pressures from abroad, particularly from imported goods, further weighing on Thailand's overall competitiveness.

A new government transition may slightly delay the enactment of the FY2027 Budget Act, potentially disrupting budget disbursement, particularly public investment, at the start of the fiscal year, which begins on October 1, 2026. Over the medium term, government spending will face tighter fiscal constraints amid challenges in fiscal reform aimed at reducing budget deficits and containing public debt below the statutory ceiling of 70% of GDP. These will be key priorities for the new government in maintaining confidence among credit rating agencies and safeguarding long-term fiscal stability. Headline inflation in 2026 is projected at 0.2%, remaining below the inflation target range due to declining global energy prices and weak demand-side pressures.

In 2025, a series of cuts reduced Thailand's policy interest rate from 2.25% to 1.25% and a further cut is expected in 2026 to 1.0% to enhance monetary policy accommodation. This stance is consistent with Thailand's economic growth remaining significantly below potential, subdued inflation that has yet to return to the target range and the need to alleviate tight financial conditions, particularly for vulnerable

households and businesses. Lower policy rates are expected to reduce financing costs, ease debt servicing burdens and enhance the effectiveness of targeted government financial support measures.

The Thai baht is expected to weaken from mid-2026 onward, driven by a strengthening U.S. dollar amid capital inflows into the United States, particularly investment related to AI technologies. Domestic factors may also exert downward pressure on the baht, including Thailand's low growth outlook and elevated political uncertainty. In addition, gold prices are expected to moderate after a strong surge in the previous year. By year end, the exchange rate is projected to range between 32.5–33.5 baht per U.S. dollar.

3. Management Discussion and Analysis

For the fourth quarter and the year ended December 31, 2025

Strategy for 2026

In 2026, SCBX's strategic focus is to solidify our market leadership in Thailand while strengthening the foundations required for our long-term vision of becoming 'The Most Admired Regional Financial Technology Group.' Against a backdrop of economic volatility, SCBX is balancing defensive resilience with disciplined growth.

SCBX is embedding AI across our operations to drive structural cost efficiency and operational excellence, ensuring our portfolio remains agile and competitive. Simultaneously, the Group is committed to allocating capital and directing resources toward high-quality growth opportunities that align with our risk appetite, aiming at long-term value creation to our shareholders. Underpinning this approach is our unwavering commitment to governance and sustainability, ensuring we maintain the trust of our stakeholders as we drive the Group's evolution.

Gen 1 (Banking Business): Strategic Calibration for Sustainable Leadership

In 2026, SCB Bank is transitioning from balance sheet optimization to **selective growth.** Having structurally strengthened our asset quality over the past years, the Bank is now positioned to deploy capital into high-quality segments where our scale, brand trust, and funding costs allows us to be in the market leading position.

The Bank sees a strategic window to re-engage with top-tier corporate clients, while we remain disciplined on risk. By leveraging our balance sheet strength and offering holistic financial solutions, the Bank aims to deepen our position as the main operating bank for leading Thai conglomerates.

As a market leader in housing loans, the Bank is refining our approach to defend and grow our portfolio. The Bank acknowledges that untapped opportunities exist within the high-credit-quality segment. Therefore, the Bank is enhancing our credit screening capabilities with advanced analytics to identify and capture prime borrowers who may have been overlooked by previous, rigid filtering models.

Wealth Management remains our primary engine for fee income growth, catalyzed by our recent strategic organizational restructuring and the deployment of AI-powered advisory tools. These internal transformations have structurally uplifted our 'Digital Wealth with Human Touch' capabilities, enabling us to capture value with greater precision independent of market cycles. By leveraging this sharpened operating model to maximize share-of-wallet, we are intensifying collaboration across SCBX Group companies to drive cross-selling and synergy.

Gen 2 (Consumer & Digital Finance Business): Operational Turnaround & Selective Growth

In 2026, our Gen 2 businesses are pivoting to a profit turnaround and selective growth. Following a rigorous period of strengthening our balance sheet through a disciplined focus on asset quality, **CardX**

is now positioned to capture growth in the unsecured lending segment, both by strengthening our credit card positioning, and selectively growing our personal loan portfolio. With a stronger asset-quality foundation and a leaner operating model, CardX is set to competitively expand its market presence, supported by AI-driven collections that help ensure credit costs remain well controlled.

Entering its fourth year of operations, **AutoX** is transitioning from a phase of rapid network expansion to strategic calibration, refining underwriting models and risk parameters to align with current economic conditions. Loan growth will be deliberate, prioritizing asset quality and portfolio health over sheer volume as AutoX optimizes the business model for long-term sustainability. AutoX is also diversifying revenue beyond interest income by aggressively expanding insurance fee income from both lending and non-lending customer segments.

Finally, our pure-play digital lenders, **MONIX** and **ABACUS digital** will continue to demonstrate robust, high-quality growth. Leveraging proprietary AI engines—such as ABACUS Core Technology (ACT) and MONIX's behavioral scoring—these entities have consistently maintained superior asset quality relative to the market. We expect them to remain steady contributors to Group profit, using their data advantage to capture underserved segments with precision.

Gen 3 (Platforms & Technology Business): Strategic Capabilities & Cost Efficiency

Gen 3 companies will continue their strategic mandate in 2026 as the Group's centralized capability engine, tasked with building the critical Data, AI, and Technology infrastructure that powers the entire SCBX ecosystem. The primary objective is to drive Group-wide cost efficiency while preserving the optionality to scale when market conditions for new technology, digital assets and platforms become more favorable.

At the core of this strategy, **TechX** will continue to serve as the Group's centralized technology backbone, driving software development and ensuring that AI are effectively embedded into business operations to create measurable value uplift. **DataX** will continue to serve as the Group's centralized data backbone, strengthening data foundations to ensure that our AI initiatives are supported by high quality and trustworthy data.

Our platform businesses, **InnovestX** and **PointX**, serve as the drivers of ecosystem connectivity. By deepening collaboration with SCB Bank, particularly in the Wealth segment, they utilize digital investment channels and a centralized loyalty infrastructure to enhance customer engagement and enable cost-efficient cross-selling. Simultaneously, **SCB 10X** and **Token X** anchor our readiness in the venture and future finance space, maintaining a disciplined R&D focus on deep-tech capabilities to ensure the Group remains market-ready for future innovation cycles.

Portfolio companies update

2025 Performance and 2026 Action Plans

SCB Bank

In 2025, SCB Bank successfully deepened its AI adoption, embedding artificial intelligence as a core driver across product design, service delivery, and risk management. This shift is already bearing fruit: by leveraging data to anticipate customer needs, income generated from AI-enabled operations nearly tripled compared to those in 2024. Beyond revenue, the Bank strengthened its operational resilience, significantly reducing platform downtime and further enhancing system stability. These achievements validate our "Digital Bank with Human Touch" strategy, proving that we can scale AI adoption responsibly while delivering the sophisticated advisory services that our clients expect.

Looking ahead, the Bank will cement its “Digital Bank with Human Touch” strategy by focusing on three strategic pillars. First, the Bank will continue to focus on high-quality loan growth, in both the corporate and retail segments, in the areas where we identify opportunity gaps and defend our strong position among high-quality customers. Second, the Bank will accelerate fee and investment income through further deepening share-of-wallet in wealth management, increasing penetration in transactional banking, particularly in key products such as cash management, trade finance, and foreign exchange, and strengthening investment and treasury capabilities by expanding investments within a disciplined risk management framework and close risk-monitoring processes. Finally, the Bank will further reinforce end-to-end risk management capabilities, maintaining adequate provisions aligned with customer risk profiles and accelerating NPL reduction through both internal and external measures.

CardX

In 2025, **CardX successfully executed a strategic turnaround to return to profitability.** This recovery was driven by a disciplined focus on asset quality—prioritizing selective growth in lower-risk segments—alongside rigorous cost control and a substantial reduction in credit costs through enhanced end-to-end risk management. Structurally, CardX achieved a historic milestone as the first financial institution in Southeast Asia to fully migrate its core credit card and personal loan systems to a cloud-based architecture. This transformation, recognized with *The Asian Banker’s* "Best Cloud-Based Technology Initiative" award, establishes the scalable data infrastructure required for our next phase of AI-driven efficiency. Commercially, our value proposition remains strong, evidenced by the CardX JCB PLATINUM winning "Product of the Year," confirming our ability to retain top-of-wallet engagement while navigating a recovery year. These achievements position CardX with a clean balance sheet and agile infrastructure for sustainable growth in 2026. At the end of 2025, CardX loan outstanding stood at Baht 86.5 billion.

Looking ahead to 2026 and beyond, CardX is positioned to be a top-of-mind provider of credit cards and personal loans by leveraging data, digital and AI capabilities to further strengthen customer

experiences and operational efficiency. CardX is now ready to grow selectively with high quality customers. CardX will continue to make investments in key business enablers, including co-investments with SCBX Group in AI capabilities to ensure excellent customer experience through improvements in credit decisioning, onboarding, customer lifetime value and service.

Additionally, CardX will mark a new milestone in 2026 as SCB Bank transfers its wealth credit card portfolio — which includes SCB Private Banking, SCB First and SCB Prime — to CardX. Together with the Bank, CardX will jointly operate and co-brand the wealth cards. This structure will gain synergies from CardX's expertise in card services and SCB's strength in wealth customer relationships, ensuring that these customers will enjoy an elevated level of card service and privileges.

AutoX

In 2025, heightened macroeconomic uncertainty required prudent risk management. AutoX responded by tightening its credit selection criteria to ensure the quality of new loans, resulting in negative loan growth. The company fine-tuned its provisioning model based on three years of operational data. To maintain business momentum, the company implemented strict cost controls and pursued non-interest income growth through expansion into insurance brokerage services, launching the new platform “Chaiyo Care Platform” to support the distribution of non-life insurance. Total loans stood at Baht 47.7 billion at the end of 2025.

Looking ahead to 2026, AutoX will focus on strengthening its foundations for sustainable growth. Key priorities are high-quality loan selection through advanced customer data analytics and proactive debt management in higher risk segments. Concurrently, the company aims to increase fee-based income from insurance brokerage by offering life and non-life insurance products to both lending customers and new segments.

Additionally, AutoX will continue to prioritize operational efficiency by integrating artificial intelligence (AI) across all processes — from loan origination to monitoring and day-to-day operations — enhancing productivity and driving long-term cost optimization.

MONIX

In 2025, MONIX celebrated its fifth anniversary of empowering Thais to break free from informal debt by launching the **“Life Fighters” campaign.** This initiative honors and supports underserved individuals by enabling confident and convenient access to legal credit and reflects MONIX’s long-standing commitment to financial inclusion over the past five years. This campaign also introduced a groundbreaking innovation, **“Fastest Approval in 5 Seconds”**. Powered by AI, machine learning, alternative data, and biometric verification, this feature delivers quick, accurate, and secure loan approvals - underscoring MONIX’s unwavering commitment to providing an exceptional digital lending experience.

MONIX expanded its customer base to over 1.5 million underserved individuals nationwide in 2025, while maintaining strong credit risk controls and cost efficiency. The company achieved robust profitability and received five prestigious national and global awards in technology and finance, reinforcing its leadership in the digital lending market. At the end of 2025, MONIX's outstanding loan book stood at Baht 17.3 billion.

Looking ahead to 2026, MONIX aims to set a new benchmark for digital lending in Thailand by becoming the No. 1 AI-powered nano-loan application. The company will focus on expanding high-quality loan portfolios, elevating customer experience through advanced technologies and analytics, penetrating provincial markets, and developing solutions that balance broader credit accessibility with precise risk management. These efforts will drive sustainable growth and enhance financial well-being for Thai people through FINNIX app, where the power of AI is guided by a human heart.

InnovestX

Amidst 2025's volatility, InnovestX achieved strong progress by bridging global investment access with superior digital engagement. InnovestX captured surging offshore demand through the strategic launch of Depository Receipts (DR) and structured products, rapidly establishing leadership in market capitalization and turnover. Concurrently, InnovestX elevated the investor experience by introducing precision tools—including portfolio analytics and stock watchlists—and enhancing customer loyalty through the integrated InnovestX Point Rewards. Underpinning this ecosystem, InnovestX leveraged SCBX Group's AI capabilities to scale advisory excellence, delivering high-velocity, personalized insights across over 1,000 global stocks to ensure precise, data-driven decision-making.

Looking ahead to 2026, InnovestX is poised for continued growth. InnovestX aims to expand our customer base and deliver a good customer experience through a seamless and reliable investment platform, enhanced end-to-end sales and services, deeper personalized advisory and recommendations, and continual feature upgrades. Through close collaboration within SCBX Group, InnovestX will play a key role in supporting the Group's broader wealth strategy, delivering integrated investment solutions that help unleashing Thais' opportunities to invest. At the same time, InnovestX will focus on improving operational efficiency to achieve higher, sustainable profitability.

SCB 10X

In 2025, SCB 10X advanced its three strategic priorities by strengthening its leadership in fintech, blockchain & Web3, and AI & deep tech; enhancing technical capabilities and accelerating technology transfer; and expanding its regional presence. SCB 10X deepened its AI network through collaborations with specialized funds and experts, resulting in 13 AI-related deployments, with about half of direct investments co-invested alongside global tier-1 investors. SCB 10X also advanced Thailand's AI ecosystem through innovations such as Typhoon 2, a Thai large language model, and Typhoon Isan, the first systematic Isan speech-to-text model, both developed by its R&D team and supported by AWS

grants and selection into the AWS Generative AI Accelerator 2025. Typhoon AI was further applied to create RISA, a learning tool reaching 10,000 students across 350 schools. To promote a sustainable tech ecosystem, SCB 10X continued community engagement through initiatives such as REDeFiNE TOMORROW 2025, its sixth global DeFi and Web3 summit, and AI-VOLUTION, a global AI summit focused on translating AI research into real-world business applications.

As we venture into 2026, SCB 10X remains committed to its moonshot mission to become Southeast Asia's leading investor in AI and blockchain and a regional technology leader in these fields. SCB 10X will continue to drive growth as the SCBX Group's disruptive technology "speedboat," sourcing insights and breakthrough solutions from leading global startups, with a strong focus on advancing artificial intelligence (AI).

2026 Guidance

In 2026, the Thai economy is expected to remain under pressure from global trade tensions and subdued external demand, while domestic recovery continues at a moderate pace. SCBX projects loan growth in the low-to-mid single digit range, reflecting a cautious stance amid economic uncertainties. Growth is anticipated to be driven by targeted expansion in the corporate segment, sustained market share in the mortgage business at SCB Bank, and incremental contributions from Gen 2 businesses. The Net Interest Margin (NIM) is forecast at 3.0–3.2%, based on the assumption of a single 25-bps policy rate cut during the year. Fee income is expected to grow at a mid-to-high single digit rate, supported by strong performance in wealth management, a recovery in bancassurance and contributions from Gen 2 businesses.

The cost-to-income ratio is targeted at low-to-mid 40s, reflecting lower topline income alongside with expenses from Virtual Bank. Despite these pressures, disciplined cost management remains a key priority to maintain operational efficiency. The credit cost is projected at 135-155 bps, reflecting proactive risk management measures and robust collection strategies to mitigate potential asset quality challenges in a volatile economic environment.

2026 Targets	**SCBX** (Consolidated)
Loan Growth (%)	Low-to-mid single digit
Net Interest Margin (NIM)	3.0-3.2%
Fee Income Growth (%)	Mid-to-high single digit
Cost to Income Ratio (%)	Low-to-mid 40s
Credit cost (bps)	135-155 bps

SCBX Performance in 4Q25 and 2025 (consolidated)

SCBX reported an audited consolidated net profit of Baht 47,488 million for 2025, representing an 8.1% increase from Baht 43,943 million in 2024. The improvement was primarily driven by higher investment gains, lower expected credit losses, and reduced operating expenses following the divestment of the Robinhood business in 2024, along with disciplined cost-control measures. In addition, fee income from wealth management continued to expand. These positive factors were partly offset by lower net interest income resulting from policy rate cuts and subdued loan growth.

In the fourth quarter of 2025, SCBX recorded a net profit of Baht 10,144 million, representing a 13.4% yoy decline. The decrease was primarily attributable to lower net interest income and higher expected credit losses. These factors were partially offset by higher investment gains and lower operating expenses, following continued cost discipline and efficiency measures.

Compared to 3Q25, SCBX's net profit declined by 15.9% qoq, primarily due to lower net interest income and a decrease in investment gains.

Table 1. Net Profit and Total Comprehensive Income

Unit: Baht million	2025	2024	% yoy	4Q25	% qoq	% yoy
Net interest income	119,117	129,424	-8.0%	28,253	-3.9%	-12.9%
Fee and others	41,695	40,657	2.6%	10,814	-0.1%	6.4%
Investment and trading income	10,771	2,293	369.8%	2,508	-24.6%	107.1%

Hire purchase	7,241	9,259	-21.8%	1,622	-6.0%	-27.0%
Investments	8,889	9,511	-6.5%	2,339	9.1%	1.6%
Others	393	548	-28.3%	105	-24.0%	50.6%
Interest expenses	**36,862**	**39,896**	**-7.6%**	**8,779**	**-4.5%**	**-13.2%**
Deposits	17,794	20,016	-11.1%	4,041	-8.0%	-22.9%
Interbank and money market	3,223	3,968	-18.8%	684	-19.1%	-24.2%
Borrowings	3,916	4,024	-2.7%	969	-5.3%	-1.8%
Contribution to the Deposit Protection Agency & FIDF	11,403	11,315	0.8%	2,845	0.0%	0.4%
Others	526	573	-8.3%	241	172.2%	54.4%
Net interest income	**119,117**	**129,424**	**-8.0%**	**28,253**	**-3.9%**	**-12.9%**

- **In 2025, net interest income** decreased by 8.0% yoy to Baht 119,117 million, primarily driven by a 41 basis-point contraction in net interest margin (NIM) following an interest rate cut 4 times in 2025 and a 2.1% decline in loan volume.
- **In the fourth quarter of 2025**, net interest income declined by 12.9% yoy to Baht 28,253 million. This decrease was due to a reduction of 64 bps in NIM, along with a 2.1% yoy drop in loan volume.
- **Compared to 3Q25**, net interest income declined by 3.9%, reflecting a 20 basis-point decrease in net interest margin (NIM), while loan growth remained relatively flat qoq.

Table 3. Yield and cost of funding

Unit: Percentage	2025	2024	4Q25	3Q25	2Q25	1Q25	4Q24
Net interest margin	3.44%	3.85%	3.24%	3.44%	3.59%	3.67%	3.88%
Yield on earning assets	4.51%	5.03%	4.25%	4.51%	4.68%	4.81%	5.09%
Yield on loans	5.77%	6.18%	5.53%	5.72%	5.82%	5.91%	6.21%
Yield on interbank and money market	1.61%	2.01%	1.35%	1.63%	1.86%	2.06%	2.18%
Yield on investment	1.80%	2.10%	1.80%	1.84%	1.87%	1.97%	2.09%
Cost of funds [1/]	1.28%	1.43%	1.20%	1.28%	1.32%	1.37%	1.46%
Cost of deposits [2/]	1.16%	1.27%	1.09%	1.16%	1.21%	1.23%	1.31%

Note Profitability ratios use the average beginning and ending balances as the denominator.

[1/] Cost of funds = Interest expenses (including contributions to DPA & FIDF) / Average interest-bearing liabilities.

[2/] Cost of deposits includes contributions to the Deposit Protection Agency and FIDF fees.

In 2025, net interest margin (NIM) declined by 41 basis points yoy to 3.44%, primarily due to lower yields across key earning asset categories — loan yields decreased by 41 basis points, interbank yields dropped by 40 basis points, and investment yields fell by 30 basis points. These declines reflected the impact of four policy rate cuts in 2025 — implemented in February 2025, April 2025, August 2025, and December 2025, as well as the "You Fight We Help" program. Although funding costs also decreased by 15 basis points, in line with the downward trend in market interest rates, the reduction was insufficient to offset the sharper decline in asset yields.

In the fourth quarter of 2025, net interest margin (NIM) declined by 64 basis points yoy and 20 basis points qoq, primarily due to lower yields on interbank placements, loans, and investments, as previously discussed. This occurred despite a reduction in funding costs, which was insufficient to offset the sharper decline in asset yields. For a detailed breakdown of loan yields by segment or product, please refer to Additional Financial Information on page 23.

Table 4. Fee and others

Unit: Baht million	2025	2024	% yoy	4Q25	% qoq	% yoy
Transactional banking *	12,689	12,432	2.1%	3,342	3.5%	4.0%
Lending related **	6,553	6,137	6.8%	1,644	-5.2%	7.5%
Wealth management ***	9,883	8,912	10.9%	2,537	-11.1%	1.3%
Bancassurance/Insurance	8,456	9,661	-12.5%	1,909	-9.6%	9.4%
Others	4,114	3,514	17.1%	1,382	54.1%	17.8%
Fee and others	**41,695**	**40,657**	**2.6%**	**10,813**	**-0.1%**	**6.4%**

* Including transactional fees, trades, and FX income

** Including loan-related and credit card fees

*** Including income from fund management, securities business, and others

- **In 2025, fees and other income** increased by 2.6% yoy to Baht 41,695 million, mainly driven by higher fee income from wealth management, supported by increased inflows into high-value funds, as well as higher lending-related fees and growth in transactional banking fees. Other fees also contributed to the increase, primarily from investment banking and capital markets (IB&CM) activities and higher gains on sales of non-performing assets (NPA). However, this growth was partially offset by a decline in bancassurance fees.
- **In the fourth quarter of 2025,** fees and other income increased by 6.4% yoy to Baht 10,814 million. This growth was primarily driven by higher bancassurance fees, transactional banking fees, lending-related fees, other fees, and wealth management fees.
- **Compared to 3Q25,** fees and other income remained relatively flat qoq, as higher other fees and transactional banking fees were offset by lower wealth management fees, which had peaked in 3Q25, along with a decline in bancassurance fees and lending-related fees.

Table 5. Investment and trading income

Unit: Baht million	2025	2024	% yoy	4Q25	% qoq	% yoy
Investment and trading income	**10,771**	**2,293**	**369.8%**	**2,508**	**-24.6%**	**107.1%**

- **In 2025**, **investment and trading income** surged by 369.8% yoy to Baht 10,771 million, driven primarily by significant gains from the investment portfolios of both the Bank and SCB 10X.
- **In the fourth quarter of 2025,** investment and trading income increased by 107.1% yoy to Baht 2,508 million, primarily driven by higher gains from the investment portfolio, as previously noted.
- **Compared to 3Q25,** investment and trading income decreased by 24.6%, primarily due to lower investment gains from the Bank's portfolio, despite higher gains from SCB 10X's investment portfolio.

Table 6. Operating expenses

Unit: Baht million	2025	2024	% yoy	4Q25	% qoq	% yoy
Employee expenses	36,396	35,494	2.5%	9,097	-0.5%	1.9%
Premises and equipment expenses	10,833	11,765	-7.9%	2,577	-6.3%	-11.3%
Taxes and duties	4,919	5,379	-8.5%	1,152	-3.4%	-13.8%
Directors' remuneration	200	213	-6.2%	51	-0.6%	20.2%
Other expenses	17,222	20,127	-14.4%	4,767	10.2%	-13.2%
Total operating expenses	**69,570**	**72,977**	**-4.7%**	**17,644**	**1.1%**	**-5.7%**
Cost-to-income ratio	**40.5%**	**42.3%**		**42.4%**		

- **In 2025, operating expenses** decreased by 4.7% yoy to Baht 69,570 million. The reduction was primarily driven by lower other expenses, lower premises and equipment costs, particularly in computer software and hardware rental and maintenance, lower taxes and duties and the strategic exit from the loss-making Purple Ventures business in 2024. Conversely, staff expenses increased, mainly reflecting personnel-related costs associated with organizational adjustments and annual salary adjustments.
- **In the fourth quarter of 2025,** operating expenses decreased by 5.7% yoy to Baht 17,644 million, primarily due to lower other expenses, reduced premises and equipment expenses, and lower taxes and duties.
- **Compared to 3Q25,** operating expenses increased slightly by 1.1% to Baht 17,644 million, primarily due to higher other expenses.

In 2025, the cost-to-income ratio stood at 40.5%, from 42.3% in 2024, well below the full-year guidance of 42-44%. This improvement was primarily driven by effective cost control measures, and the Company remains committed to maintaining strong cost discipline. In 4Q25, the cost-to-income ratio increased to 42.4% from 40.1% in 3Q25 but decreased from 42.7% in 4Q24.

Table 7. Expected credit loss (ECL)

Unit: Baht million	2025	2024	% yoy	4Q25	% qoq	% yoy
Expected credit loss	41,469	42,594	-2.6%	10,964	1.3%	11.9%
Credit cost (bps)	174	176		186		

- **In 2025, expected credit losses** declined yoy to Baht 41,469 million, equivalent to 174 basis points of total loans. The decrease was primarily driven by lower credit costs at CardX. Additionally, the Bank prudently set aside a management overlay provision of Baht 4,500 million during the year as a precautionary measure to address potential macroeconomic uncertainties. This provision reflects the procyclicality of forward-looking ECL models under the TFRS 9 framework and incorporates overlays aligned with prevailing economic conditions.

Balance sheet as of December 31, 2025 (Consolidated basis)

As of December 31, 2025, the Company's total assets increased by 4.7% yoy to Baht 3,651 billion. The growth was primarily driven by an increase in investments, as well as interbank and money market items. This was partially offset by a 2.1% decline in loan balances. Further details on the consolidated balance sheet are provided in the following sections.

Table 8. Loans by segment

Unit: Baht million	Dec 31, 25	Dec 31, 24	% yoy	Sep 30, 25	% qoq
Corporate	857,723	843,021	1.7%	847,326	1.2%
SME	378,485	403,183	-6.1%	385,771	-1.9%
Retail	944,983	972,622	-2.8%	950,879	-0.6%
Housing loans	777,568	776,796	0.1%	778,706	-0.1%
Auto loans	122,102	150,671	-19.0%	129,552	-5.8%
Unsecured loans	18,198	22,845	-20.3%	18,202	0.0%
Other loans	27,115	22,310	21.5%	24,419	11.0%

CardX	86,502	99,982	-13.5%	84,345	2.6%
AutoX	47,659	52,710	-9.6%	49,798	-4.3%
Other portfolio companies	37,518	31,860	17.8%	35,351	6.1%
Total loans *	**2,352,870**	**2,403,378**	**-2.1%**	**2,353,470**	**0.0%**

* Total loan excluded unamortized modification loss

Total loans declined by 2.1% yoy and remained flat qoq as of December 2025. The breakdown of loan volume changes by customer segment is as follows:

- **Corporate** loans grew by 1.7% yoy and 1.2% qoq, primarily driven by strong demand from large corporates with high credit quality, especially in the last quarter of the year. The Bank continues to pursue corporate lending through a selective and strategic approach, prioritizing quality over volume.
- **SME** loans contracted by 6.1% yoy and 1.9% qoq, primarily due to loan repayments and stricter new loan booking requirements across both SME and small SME segments. The Bank continues to closely monitor credit quality while maintaining a prudent lending approach in this segment.
- **Retail** loans decreased by 2.8% yoy and 0.6% qoq. Below are details of changes in loan volume by sub-segment.
  - **Housing loans** remained broadly stable yoy and qoq as of 4Q25. This stability reflects sustained demand for high-end housing developments despite intense competition in the mortgage market. The Bank continues to defend its market share in the housing loan segment through targeted offerings and competitive positioning.
  - **Auto loans** declined by 19.0% yoy and 5.8% qoq, mainly due to repayments across all car segments. In line with its strategic direction, the Bank has been gradually reducing its hire purchase loan portfolio, with a focus on risk management and portfolio optimization.
- **Loans under portfolio companies,** including CardX, AutoX, MONIX, ABACUS digital, and InnovestX, decreased by 7.0% yoy but grew by 1.3% qoq, reaching Baht 171,679 million.
  - **CardX loans,** including personal loans and credit card receivables, totaled Baht 86,502 million, down 13.5% yoy but up 2.6% qoq. The yoy decline reflects CardX's cautious approach to the credit environment, leading to tighter underwriting standards for new loan bookings. Additionally, the Company intentionally scaled down its Speedy Loan product and reduced exposure to the self-employed segment within its personal loan portfolio. The qoq increase was mainly driven by seasonal factors, as credit card spending typically rises toward year-end.
  - **AutoX loans** totaled Baht 47,659 million, reflecting a decline of 9.6% yoy and 4.3% qoq. The decrease was primarily driven by AutoX's cautious approach to risk management, including tighter underwriting standards and stricter credit selection criteria to ensure the quality of new loans. The Company has also shifted its focus toward collection efforts and continues to closely monitor credit quality within the auto title loan segment.

Table 9. Deposits breakdown

Unit: Baht million	Dec 31, 25	Dec 31, 24	% yoy	Sep 30, 25	% qoq
Demand	125,144	123,434	1.4%	131,482	-4.8%
Savings	1,906,768	1,794,781	6.2%	1,832,963	4.0%
Fixed	531,403	555,411	-4.3%	532,159	-0.1%
Less than 6 months	95,700	81,035	18.1%	97,375	-1.7%
6 months and less than 1 year	112,235	147,981	-24.2%	113,509	-1.1%
Over 1 year	323,468	326,395	-0.9%	321,275	0.7%
Total deposits	**2,563,315**	**2,473,626**	**3.6%**	**2,496,604**	**2.7%**
CASA - Current & Savings Accounts (%)	79.3%	77.5%		78.7%	
Gross loans to deposits ratio (Bank only)	86.9%	91.5%		89.1%	
Liquidity ratio (Bank-only)	36.8%	32.5%		34.5%	

As of December 31, 2025, total **deposits** increased by 3.6% yoy and 2.7% qoq, driven primarily by growth in savings deposits. This resulted in an improved CASA mix of 79.3%, up from 77.5% at the end of December 2024 and 78.7% at the end of September 2025. Consequently, the Bank-only gross loans-to-deposits ratio declined to 86.9%, compared to 91.5% as of December 2024, reflecting a contraction in loan balances alongside a stronger deposit base.

The Bank's daily liquidity ratio of 36.8%, as measured by total liquid assets to total deposits (at a bank-only level), was well above the 20% minimum threshold.

Table 10. Investment Classification

Unit: Baht million

Investments	Dec 31, 25	Dec 31, 24	% yoy	Sep 30, 25	% qoq
Financial assets measured at FVTPL	132,516	114,352	15.9%	132,419	0.1%
Investments in debt securities measured at amortised cost	227,739	216,820	5.0%	217,720	4.6%
Investments in debt securities measured at FVOCI	196,720	96,184	104.5%	126,327	55.7%
Investments in equity securities measured at FVOCI	3,502	1,833	91.0%	3,929	-10.9%
Net investment *	**427,961**	**314,837**	**35.9%**	**347,976**	**23.0%**
Investment in associates	2,025	1,842	9.9%	1,811	11.8%
Total	**562,502**	**431,031**	**30.5%**	**482,206**	**16.7%**

* Net investments comprise investments measured at amortized cost and measured at FVOCI

As of December 31, 2025, total investments increased by 30.5% yoy and 16.7% qoq. The yoy growth was primarily driven by higher holdings of government bonds and foreign debt instruments measured at FVOCI, increased investment in government bonds measured at amortized cost, as well as higher financial assets measured at FVTPL, particularly government bonds and foreign debt instruments. The qoq growth was primarily driven by increased investments in government bonds measured at FVOCI and amortized cost.

Statutory Capital

SCBX Financial Group is subject to the same regulations as the Bank, namely the BOT's consolidated supervision guidelines, and must maintain the same minimum capital requirements including additional buffers. The required additional buffers consist of a 2.5% conservation buffer to be held in CET1 and a 1% Domestic Systemically Important Banks (D-SIBs) buffer.

SCBX Financial Group follows a prudent approach to capital management by maintaining capital well above the minimum regulatory requirements and ensuring adequate loan loss provisions. This additional cushion allows SCBX Financial Group to better handle unforeseen events and absorb emerging risks that may arise from new businesses in the future.

Capital positions of SCBX Financial Group and the Bank at the end of December 2025 under the Basel III framework are shown in the table below.

Table 11. Total Regulatory Capital

	SCBX (Consolidated)			SCB Bank (Bank-only)		
Unit: Baht million, %	Dec 31, 25	Sep 30, 25	Dec 31, 24	Dec 31, 25	Sep 30, 25	Dec 31, 24
Statutory Capital						
Common Equity Tier 1	425,465	426,688	424,625	385,919	386,278	374,445
Tier 1 capital	427,807	428,922	427,000	385,919	386,278	374,445
Tier 2 capital	26,351	26,529	26,364	23,761	23,918	23,752
Total capital	**454,158**	**455,451**	**453,364**	**409,681**	**410,196**	**398,196**
Risk-weighted assets	2,396,903	2,409,062	2,396,562	2,161,822	2,178,508	2,154,228
Capital Adequacy Ratio	**18.9%**	**18.9%**	**18.9%**	**19.0%**	**18.8%**	**18.5%**
Common Equity Tier 1	17.8%	17.7%	17.7%	17.9%	17.7%	17.4%
Tier 1 capital	17.8%	17.8%	17.8%	17.9%	17.7%	17.4%
Tier 2 capital	1.1%	1.1%	1.1%	1.1%	1.1%	1.1%

Consolidated common equity Tier 1/Tier 1 capital of SCBX Financial Group remained at 17.8% at the end of December 2025 mainly from the appropriation of net profit after dividend payment. On the Bank-only basis, common equity Tier 1/Tier 1 capital increased yoy to 17.9%. The dividend payment from SCB Bank to SCBX for funding purposes is considered an intra-group transaction and thus will only affect the capital position of the Bank but not of SCBX.

Asset Quality

As of December 31, 2025, **non-performing loans** (NPLs) on a consolidated basis totaled Baht 96.2 billion, down 1.5% yoy but up 1.0% qoq. The yoy improvement was driven by better asset quality in the SME and corporate segments, as well as the auto hire purchase portfolio. The qoq increase was primarily driven by Gen 2 businesses, led by AutoX, with additional contributions from the mortgage segment. The consolidated **NPL ratio** declined to 3.29%, compared to 3.37% at the end of December 2024.

At the end of December 2025, the Group's **coverage ratio** strengthened to 160.8%, an increase of 2.8% yoy. The improvement was primarily driven by a reduction in NPLs and higher allowance for expected credit losses. The Group's loan loss reserve as a percentage of total loans (LLR %) remained strong at 6.2%, reflecting a prudent approach to credit risk management.

Table 12. Asset quality

Unit: Baht million, %	Dec 31, 25	Sep 30, 25	Dec 31, 24
SCBX (Consolidated)			
Non-Performing Loans (NPLs)	96,165	95,252	97,610
NPL ratio	3.29%	3.30%	3.37%
Total allowance*	154,586	154,004	154,245
Total allowance to NPLs (Coverage ratio)	160.8%	161.7%	158.0%
Credit cost (Quarterly, bps)	186	182	162
SCB Bank (Bank-only)			
Non-Performing Loans (NPLs)	88,048	87,787	90,101
NPL ratio	3.12%	3.17%	3.26%

* Total allowance includes loans, interbank and loan commitments, and financial guarantee contracts.

Loan Classification and Allowance for Expected Credit Losses

Under TFRS 9, loans are classified into 3 stages based on changes in credit quality since initial recognition. Loans and allowances for expected credit losses at the end of December 2025, September 2025, and December 2024 were classified as follows:

Table 13. Loans and allowances for expected credit losses by stages

Unit: Baht million	Dec 31, 25		Sep 30, 25		Dec 31, 24	
	Loans and interbank	ECL*	Loans and interbank	ECL*	Loans and interbank	ECL*
Stage 1 (Performing)	2,605,582	27,773	2,570,408	29,617	2,571,361	28,547
Stage 2 (Underperforming)	220,534	73,748	224,031	72,167	224,150	70,151
Stage 3 (Non-performing)	96,165	53,066	95,252	52,220	97,610	55,547
Total	**2,922,281**	**154,586**	**2,889,691**	**154,004**	**2,893,121**	**154,245**

* Including ECL for loans, interbank and loan commitments, and financial guarantee contracts.

Table 14. Loans of Gen 1 and Gen 2 by stages

Unit: Baht million	Dec 31, 25	Dec 31, 24	% yoy	Sep 30, 25	% qoq
Gen 1					
Stage 1 (Performing)	1,956,205	1,972,030	-0.8%	1,936,706	1.0%
Stage 2 (Underperforming)	205,354	209,645	-2.0%	208,801	-1.7%

Stage 2 (Underperforming)	15,180	14,505	4.7%	15,230	-0.3%
Stage 3 (Non-performing)	6,779	6,185	9.6%	6,129	10.6%
Total	**158,625**	**172,310**	**-7.9%**	**157,427**	**0.8%**

Sources and Uses of Funds

As of December 31, 2025, deposits accounted for 70.2% of SCBX's funding base. Other major sources of funds were: 13.7% from shareholders' equity, 7.7% from interbank borrowings, and 3.3% from debt issuance. Uses of funds for this same period were: 64.4% for loans, 17.0% for interbank and money market lending, 15.4% for investments in securities, and 1.2% held in cash.

Segment Performance

2025 Operational Performance

Unit: Baht billion	Total operating income	% portion	Cost income ratio	Credit cost	Net profit (loss)	% portion	Total loans

Total	**171.6**		40.5%	1.74%	**47.5**		**2,353**

* Before deducting intercompany transactions

Gen 1 - Banking Business

2025 Performance

- For 2025, **net interest income** declined by 10.1% yoy to Baht 94.0 billion, primarily due to a 39 basis-point reduction in net interest margin (on a daily average basis) following interest rate cuts. Additionally, a 1.0% yoy contraction in loan volume further contributed to the decline.
- **Non-interest income** rose by 13.7% yoy to Baht 44.6 billion, driven primarily by higher investment gains and increased fee income from wealth management, lending-related activities,

and transactional banking services. These positive contributions were partially offset by softer bancassurance fee income.

- **Total operating income** amounted to Baht 138.6 billion, down 3.6% yoy, primarily due to lower net interest income.
- For 2025, **operating expenses** decreased by 3.4% yoy to Baht 53.5 billion, reflecting the effectiveness of cost-control measures. The Bank remains committed to maintaining cost discipline, achieving a cost-to-income ratio of 38.6% for the year.
- **Net profit** for 2025 was Baht 45.8 billion, down 6.9% yoy, corresponding to a return on equity (ROE) of 10.4%.
- As of December 31, 2025, **total loans** declined by 1.0% yoy, driven by reductions in the SME and retail segments. The Bank continued to prioritize quality growth, focusing on optimizing risk-adjusted returns within its defined risk appetite.
- As of December 31, 2025, **the NPL ratio** improved to 3.14%, down from 3.19% at the end of September 2025 and 3.28% at the end of 2024. In absolute terms, NPLs decreased by 2.3% yoy to Baht 88.6 billion, primarily driven by improved asset quality in the SME and corporate segments, as well as the auto hire purchase portfolio. The Bank maintained a strong coverage ratio of 156.5% as of year-end, underscoring its prudent provisioning approach and continued focus on credit risk management.

Gen 2 – Consumer & Digital Finance Business

2025 Performance

- Net interest income increased by 2% yoy to Baht 24.8 billion, primarily driven by a widening net interest margin, despite an 8% decline in loan volume. This reflects the Bank's ability to optimize yields amid a changing interest rate environment.
- Total operating income decreased by 1% yoy to Baht 28.6 billion, largely due to lower non-interest income, which accounted for approximately 16% of the Group's total operating income.
- Operating expenses for Gen 2 decreased by 1% yoy to Baht 12.3 billion, resulting in a cost-to-income ratio of 43%. Companies under Gen 2 continued to emphasize effective cost management, maintaining operational efficiency despite revenue pressures.
- In 2025, credit costs for Gen 2 increased to 8.1%, up from 7.8% in 9M25, though still below the 9.0% recorded in 2024. The qoq increase was primarily driven by AutoX, while CardX continued to show improvement through disciplined asset quality management.
- Gen 2 companies recorded a net profit of Baht 2.5 billion in 2025, driven mainly by lower expected credit losses, higher net interest income, and effective cost management.
- Total loans for Gen 2 companies declined by 8% yoy to Baht 159 billion in 2025, primarily due to reductions in loan balances at CardX and AutoX, reflecting cautious credit strategies and

portfolio optimization. In contrast, MONIX continued to deliver loan growth during the same period, supported by targeted customer acquisition and strong digital lending capabilities.

- In 2025, NPLs for Gen 2 companies increased by 9.6% yoy in absolute terms, primarily due to higher NPLs at AutoX and MONIX, despite a decline at CardX. These trends were influenced by the slower pace of economic recovery. The Group continues to actively manage credit risk across Gen 2 entities to preserve portfolio quality

Gen 3 – Platforms & Technology Business

2025 Performance

- In 2025, total operating income increased significantly by 37% yoy to Baht 7.8 billion, primarily driven by higher investment gains from SCB 10X. This represented approximately 5% of the Group's total operating income.
- Operating expenses for Gen 3 companies declined significantly by 32% yoy, driven by the exit from the loss-making Purple Ventures in 2024. As a result, Gen 3's cost-to-income ratio improved to 68% in 2025.
- In 2025, Gen 3 companies reported a net profit of Baht 2.0 billion, primarily supported by higher investment gains and substantially lower operating expenses following the exit of Purple Ventures.

4. SCBX and Sustainability

Progress Towards Delivering on SCBX Group Sustainability Commitments

SCBX promotes and supports group-wide sustainability performance according to the Group Sustainability Framework comprising four pillars - Planting Digital Seeds, Enriching Lives, Growing Economic Resilience and Achieving Climate Neutrality – as guided by the sustainability mission of 'Opportunities for Everyone, Possibilities Everyday'.

In the fourth quarter of 2025, key performance includes:

Planting Digital Seeds

SCBX Group is committed to contributing to the development of a sustainable digital ecosystem by integrating technology and innovation to support the growth of businesses and society. The Group places strong emphasis on digital solutions and cybersecurity, alongside investments in developing future-ready digital skills. This includes advancing its position as an AI-driven organization, enhancing employees' data and technology capabilities, and promoting essential digital skills among the Thai population. These efforts aim to enable a sustainable digital future and support long-term economic growth, with key initiatives implemented through the following measures.

- **Alpha X:** Alpha X strengthened its technology risk management and operational resilience by implementing a **ZERO TRUST** security framework for work-from-anywhere devices. By verifying every access request, enforcing least-privilege permissions, and continuously monitoring activity, the approach mitigates cyber threats, limits unauthorized system movement, and enhances data protection. This initiative supports robust cybersecurity governance and reinforces the organization's overall resilience.
- **AutoX:** AutoX has initiated and developed several additional AI-driven projects, some of which are currently under active development. One key initiative is Chaiyo Hero, an AI-powered HR platform that supports a people-centric, AI-first transformation. By integrating machine learning and behavioral analytics, the platform enhances workforce capability development while aligning organizational performance with employee well-being. Also, AutoX strengthened workforce readiness through a series of employee training programs focused on digital and AI capabilities. Key initiatives included a workshop on **Power Automate for designing smart workflow** to enable head office employees to design and implement automated workflows, a workshop on **Smart Insurance Selling with Copilot Chat Web** to enhance AI-assisted customer engagement for branch teams, and an **AI Foundation Plus** e-learning course to build effective AI prompting skills. Collectively, these programs supported productivity improvement, effectiveness, and future-ready digital competencies.
- **CardX:** CardX advanced operational excellence and workforce capability through the continued adoption of AI-powered solutions. AI-based Collection Quality Assurance (QA) was used to scale call monitoring and coaching, resulting in 75% of assessed calls meeting the Call QA Standard by

December 2025. To further strengthen agent performance, CardX launched AI-Coaching in December 2025, providing structured practice and feedback to improve call behaviors before real customer interactions. Complementing these initiatives, 108 employees completed digital and data skills training programs, such as Power Automate for Business Users and data analytics workflows which help improve effectiveness and strengthen future-ready skills

- **DataX:** DataX also advanced SCBX's AI-first strategy through **aGenX**, the Group's Generative AI platform, enabling scalable, responsible, and self-service AI adoption across portfolio companies. In 2025, approximately 36 GenAI and data-driven initiatives were delivered and adopted at group level. DataX also served as the Group's Data & AI Centre of Excellence, strengthening governance, privacy, and responsible AI practices while preparing for operational rollout in 2026. During the year, DataX invested Baht 24.7 million in digital platforms and security, received multiple international and domestic innovation awards, and demonstrated research leadership with an AI paper accepted and presented at Empirical Methods in Natural Language Processing (EMNLP) 2025.
- **SCB:** SCB continued to strengthen its secure digital ecosystem by enhancing cybersecurity controls, proactive threat monitoring, and fraud prevention capabilities. Security measures aligned with regulatory standards safeguard customer and personal data, while advanced cyber intelligence and analytics enable early detection and response to emerging risks. These initiatives enhance system resilience, combat online fraud, and uphold customer trust across digital banking services.

  In parallel, the organization advanced human capital development and social impact through targeted education and leadership initiatives. The AFAST Smart School program equipped Thai educators with competency-based, technology-enabled teaching capabilities, reaching over 300 teachers and benefiting more than 7,200 students nationwide in 2025, with plans to expand into decentralized Learning Hubs. At the organizational level, SCB strengthened transformational leadership readiness by certifying 27 leaders who drove innovation and delivered high-impact initiatives, reinforcing long-term change and sustainable performance.
- **Token X**: Token X contributed to the growth of the digital asset and technology ecosystem through active participation in industry events and thought leadership engagements. At **Onchain on the Ground (Bangkok)**, held during Thailand Blockchain Week, Token X highlighted its approach to enabling institutional adoption and real-world asset tokenization through secure and compliant infrastructure, engaging with approximately 100 community participants. In addition, Token X participated in the **AI in Gaming Seminar (Bangkok)** attended by around 50 stakeholders across AI, gaming, and investment sectors, including a panel discussion on combining AI, real-world assets, and gamification, reinforcing the company's commitment to innovation and regional collaboration.

Enriching Lives

SCBX Group is committed to supporting small businesses and individuals by combining technological advancements with business expertise and partner networks to drive innovation and new initiatives. The Group aims to reduce income disparity, expand access to social opportunities, and strengthen grassroots economic resilience. Its focus is on making financial services simple and accessible for everyone through inclusive financial and digital offerings, particularly for underserved groups, alongside enhancing financial capability and well-being. SCBX Group also supports SMEs, startups, communities, and society through digital technologies, knowledge, and essential 21st-century skills to enable sustainable growth potential. Key initiatives are implemented through the following measures.

- **ABACUS digital:** To support small business development and financial inclusion, ABACUS digital introduced new educational articles focused on enhancing financial literacy for small business owners. Topics included strategies for business expansion with limited capital and practical tips to improve online sales effectiveness *(e.g., "Want to expand your business but have no capital?", "3 ways to make your online selling posts perform better", etc.)*, helping entrepreneurs build financial capability and business resilience.

- **AutoX:** AutoX conducted an employee online live training program on financial literacy to enhance employees' financial well-being and promote a responsible money mindset. The program provided practical guidance on personal financial planning, risk management, and year-end tax planning, supporting AutoX's commitment to social sustainability and long-term employee financial security.

- **InnovestX:** InnovestX advanced investment education by delivering and supporting multiple learning initiatives for diverse audiences. The company sponsored a CU Value Investor Club seminar, where an InnovestX analyst shared professional perspectives on momentum investing with students and the public. In addition, InnovestX hosted live online sessions focused on tax planning through investment, providing practical guidance on aligning investment strategies with individual tax profiles. InnovestX also continued TFEX Trader Camp 6, offering structured training on derivatives trading fundamentals, technical analysis, and real-world case studies to build confident and responsible trading capabilities.

- **SCB:** SCB continued to advance social sustainability through integrated initiatives spanning youth development, customer capability building, community resilience, and SME empowerment. SCB supported business capability development through hands-on training for corporate clients on SCB Business Anywhere, enabling more efficient financial management, digital adoption, and workflow optimization through guided demonstrations and expert support. In parallel, SCB delivered the 20th SCB Challenge Project to promote holistic youth development and 21st-century skills through experiential learning under the theme "Art and Science Toward the Future." The nationwide program engaged 160 schools, reaching 640 primary-level students and 320 teachers, with 24 finalist teams competing at the national level and strengthening competencies in critical thinking, communication, creativity, collaboration, ethical values, and teamwork. At the

same time, Business Banking continued to empower SMEs for sustainable growth through targeted initiatives supporting family-business succession, technology and productivity enhancement, and sustainable tourism transition aligned with Green Hotel Plus standards, reinforcing long-term business resilience, environmental performance, and inclusive economic growth.

SCB also responded to multiple humanitarian challenges, including floods, border-area unrest, and cold-weather hardship, by mobilizing employees, branch networks, and public-sector partners to deliver timely assistance. Relief efforts included the distribution of eco-friendly blankets and relief packs to affected communities nationwide, alongside financial contributions through the Thai Red Cross Society and the Friends in Need (of "Pa") Volunteers Foundation. These actions were complemented using recycled materials in selected relief supplies, integrating circular-economy principles into social assistance.

Growing Economic Resilience

SCBX Group is committed to serving as a bridge in driving the transition toward a low-carbon economy and strengthening social resilience by supporting sustainable finance for long-term economic stability. The Group integrates environmental, social, and governance (ESG) considerations into its financial support processes, the development and delivery of comprehensive financial products and services, and investments that meet diverse customer needs. These efforts are carried out in parallel with managing environmental and social impacts through responsible lending, green/ESG financial products and services, and sustainable investment. Key initiatives are implemented through the following measures.

- **SCB**: Sustainability-Linked Financing played a key role in supporting corporate transition and capital market development. In 2025, SCB delivered sustainability loans with total approved loans exceeding Baht 78.6 billion. In the fourth quarter, with support from SCB, Banpu secured Baht 6,000 million in Sustainability-Linked Financing to invest in cleaner energy businesses aligned with its transition strategy. Additionally, MINT issued Baht 8,000 million in Sustainability-Linked Bonds in November 2025, including Thailand's first-ever zero-coupon SLB, attracting strong investor demand and significant oversubscription. The bonds are linked to SBTi-validated emissions reduction targets aligned with the 1.5°C pathway, reinforcing accountability, climate ambition, and alignment with international sustainability standards.

  In parallel, SCB advanced sustainable finance in 4Q25 by expanding green and sustainable lending to SME, retail, and small SME (sSME) customers. For SMEs, the majority of green loan exposure was directed toward renewable energy, with around 70% financing solar cell installations, complemented by investments in electric buses, energy-efficient machinery, and pollution-control technologies. In consumer banking, SCB provided Baht 36 million in sustainable financing through retail auto and mortgage products to support energy efficiency and environmental impact reduction, while monitoring market risks related to EV price volatility.

- **SCBAM:** SCBAM advanced its responsible investment practices by embedding ESG considerations across its investment processes in line with the UN Principles for Responsible Investment (UN PRI). Through successful completion of voluntary reporting and compliance with UN PRI minimum requirements, SCBAM reinforces its commitment to responsible investment, active ownership, and transparency. These efforts strengthen ESG integration across portfolios and contribute to sustainable, long-term outcomes for clients and stakeholders.

Reaching Climate Neutrality

SCBX Group is committed to achieving its Net Zero Commitment as a financial technology company by 2050, guided by strategies for net-zero greenhouse gas emissions and climate technology aligned with critical need to limit the global temperature in line with the Paris Agreement. The Group aims to strengthen internal management, enhance incentives for transition, build and connect ecosystems that support a Net Zero pathway, and uphold international standards. In parallel, it focuses on ecological efficiency through effective management of energy, natural resources, and waste, the application of digital technologies, raising organizational awareness, and promoting participation across the supply chain. Key initiatives are implemented through the following measures.

- **SCBX Group:** To promote sustainable tourism and climate action, the organization partnered with the Department of Climate Change and Environment (DCCE) to organize a workshop aimed at strengthening the capabilities of Thai hotel entrepreneurs in achieving Green Hotel Plus (GHP) certification, a standard recognized by the Global Sustainable Tourism Council (GSTC). The program attracted over 100 participants across the hospitality sector. Alongside this initiative, the organization invested in renewable energy by installing solar rooftop systems at five branches, totaling 227.7 kWp, which are expected to reduce greenhouse gas emissions by more than 169 tons of CO_2 equivalent annually.
